

Your files anywhere – anytime...

Acquire comfort and control!

Bubba™ server is small, really small! All you want from a full-size PC you get from our mini-sized Bubba™ server, designed to fit your home as your life-style home-server. With Bubba™ server you get a product in a small form factor but still heavyweight featured ready to serve you...

- **Bubba, the home file server:** Allows you to access all your files from work or school at all times. Time to live life smarter and forget about USB memories and portable media.
- **Bubba, the affordably functional Linux device:** Allows you to use energy efficient technology cutting your quarterly energy-bill next to 'nothing'. Choose pre-installed functions or features from 10000+ Linux/Debian apps.

- **Bubba, the download manager:** Turn off your computer and relax! Let Bubba download your large files. Our fan-free technology makes Bubba quiet enough to run 24-7.

- **Bubba, the web, e-mail and FTP server:** Unplug your PC when it's not needed. Save yourself from high energy costs and noise and gain comfort and control instead!

- **Bubba, back-up:** Get your mind at rest at low cost, and save all your critical files for the future at the same time.

- **Bubba, the central e-mail server:** Allows you to access your e-mail from POP or IMAP accounts. Make all of your e-mail available to you, wherever you are, on one single address through web mail or IMAP.
